Dear Sir/Madam,

Our organization IntelliBricks offers STEM enrichment classes at schools and community centers in Greater Sacramento area. Our hands on classes expose children to robotics, simple machines and motorized mechanisms, alternative energy, etc. All using variety of LEGO bricks that children normally don't have at home.

Science, Technology, Engineering and Mathematics—STEM, and therefore, STEM education—are vital to our future—the future of our country, the future of our region and the future of our children. Besides, STEM is everywhere; it shapes our everyday experiences. In the technological age in which our children live, STEM is their future, their best career options, and their key to wise decisions. That is exactly why, communities have been seeking the services of organizations like IntelliBricks to provide the imperative knowledge and experience to their young generation.

Few years back when IntelliBricks approached Loomis Town Hall, they didn't have a venue for us to offer STEM classes to the children. Friends of Loomis Library arranged to offer IntelliBricks workshop at the current library building and there was an overwhelming interest from parents of young children to take part in the workshop. In a very short notice nearly 50 children participated in the workshop, and the community have been requesting us to hold summer camps. The obstacle here is the lack of space to hold an event like this.

It is imperative for every city to provide a community for children to learn and thrive in addition to the formal education system. Loomis Library is just that perfect building to not only bring IntelliBricks to Loomis but also a plethora of options for young children and adults. We sincerely hope that the building stays in the community and serves the families of Loomis for generations to come.

Thank You.
Yours Sincerely,

To the Friends of the Loomis Library:

6125 King Road, Suite 101
Loomis, CA 95650

I hereby pledge my commitment to support the library in Loomis through my participation in various community-building and educational programs for both youth and adults. These programs include and are not limited to implementing and leading a "Read to Dogs" program for children age 6-10 in partnership with the Lend A Heart Lend A Hand Animal-Assisted Therapy of Sacramento and participating in "health awareness" workshops, leading the discussion in oral healthcare.

Sincerely yours,

Junie Baldonado, DDS
